

Mineral gear oil designed for manual transmissions and other units where the manufacturer recommends an API GL-4 class product.

Volume:

Meets requirements:

GL-4

Typicals characteristics:

Kinematic viscosity at 100°C, mm ² /s	14,24
Viscosity index, min	137
Mass fraction of mechanical impurities, %, not more	-
Mass fraction of water, %, not more	-
Open cupflash point , °C	231
Pour point, °C, not higher	- 31
Density at 20°C, g/sm ³ , not more	0,891
Self-ignition temperature, °C	over 220

Conditions for safe storage of chemical products: the oil should be stored in the manufacturer's packaging on racks, pallets or in stacks in covered warehouses, in a roofed facility or on a structured site protected from direct sunlight and precipitation. Keep out of reach of children. The shelf life: 5 years from the date of manufacture, provided that transportation and storage conditions are observed.
