

Semi-synthetic motor oil. Protects the engine from premature wear and the formation of deposits and sludge. Designed for use in temperate climates, as well as for high-sulphur fuels. Recommended for gasoline and diesel engines.

Volume:

Meets requirements:

ACEA A3/B3/B4

API SG/CF

MB 229.1

VW 501.01/505.00

Typicals characteristics:

Kinematic viscosity at 40°C, mm ² /s	13,40
Viscosity index, min	178
Mass fraction of mechanical impurities, %, not more	-
Mass fraction of water, %, not more	-
Open cupflash point , °C	228
Pour point, °C, not higher	- 34
Acid value, mg KOH per 1g of oil	12,2
Density at 20°C, kg/m ³ , not more	850,0
Self-ignition temperature, °C	over 220
Sulphate ash, %	1,48

Conditions for safe storage of chemical products: the oil should be stored in the manufacturer's packaging on racks, pallets or in stacks in covered warehouses, in a roofed facility or on a structured site protected from direct sunlight and precipitation. Keep out of reach of children. The shelf life: 5 years from the date of manufacture, provided that transportation and storage conditions are observed.
